Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Greisen '460

The patent to Greisen '460 clearly discloses all of the recited subject matter as shown by Greisen's Fig.1. It will be noted that Greisen's screw and wing nut arrangement (not explicitly labeled) defining the "pivot axis" inherently permits an adjustable connection to achieve a desired clamping.

With respect to claims 5 and 7, it will be added that the phrases "relatively close" and "relatively far" are merely relative in nature. Further, with respect to claims 6 and 7, the "pulling direction" merely depends on which direction a user decides to "pull" the device thus determining which side would be the "upstream" or "downstream" end.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1744

4. Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greisen '460.

Greisen '460 already teaches an "acute angle" between the longitudinal direction of the handle and the "pivot axis" of the mount and handle (Fig.1) which would appear to be around 75 degrees, however, it is within the level of ordinary skill to have modified the acute angle as is being specifically claimed for the purpose of facilitating cleaning of hard to reach areas of walls or windows. It should be noted that Greisen already shows the handle being canted (Fig.1) and it would be obvious to have canted the handle to a greater degree to reduce the acute angle in order to access hard to reach areas of walls or windows.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Bowen and Ziskind are pertinent to squeegee arrangements with angled handles.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 1744

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
